SUBJECT: Preliminary Studies  
Refectory, Bath House, and  
Boat House SP-54-Tyler

Gentlemen:

Attached are additional preliminary plans of proposed water front developments Tyler SP-54, Sheets 1, 2, and 3 and also preliminary layout of adjacent parking area and typewritten justification of the parking solution presented.

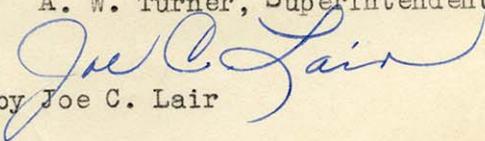

It is our opinion that the layout of Refectory, Bath House and Boathouse here presented is the most practical and logical solution yet considered for this park, and we request an early approval of the preliminary drawings in order that detail drawings for individual projects may be begun.

The layout comprises three major buildings, as indicated by the plot plan; with the possibility of further breakdown into several other smaller projects such as boat docks, shelter, etc. if such a breakdown is thought to be desirable.

Preliminary estimates of cost will be submitted at a later date.

Yours very truly

A. W. Turner, Superintendent
