§1.71 Definition of Population Served

For a city, nonprofit corporation, and/or county-established library receiving public monies for public library service, the population served by a public library is the population in the most recent decennial census or official population estimate of the United States Department of Commerce, Bureau of the Census, if available. If a library does not report receiving public monies for public library service, that library will be assigned no population. Calculations will be based upon the following.

1. In counties with one or more public libraries that receive only city and private funds, each library is credited with serving the population of the city or cities from which it receives funds or with which it has a contract.

2. In counties with only one public library and that library receives county funds, the library is credited with serving the entire county population.

3. In counties with more than one public library that receives both city and county funds, the libraries that receive city and county funds are credited with serving their city population plus a percentage of the population living outside the cities. This percentage is the ratio of each city's population to the total of all the populations of cities with public libraries within the county.

4. In counties with a library established by the county commissioners court and that receives no city funds or an incorporated library that receives no city funds, and one or more city libraries that receive county funds, the city libraries that receive county and city funds are credited with serving their city population plus a percentage of the population living outside the cities. The percentage is the ratio of each city's population to the county population. The county library or incorporated library that receives county funds and no city funds serves all county residents not served by a city library.

5. In counties with one library that receives county funds and one or more public libraries that do not receive county funds, the library that receives county funds is credited with serving the county population less the populations of cities with public libraries.

6. In counties with more than one library that receives county funds and no city funds, the county population living outside cities with public libraries will be prorated among the libraries in the same ratio as the county funds are expended.

7. When school districts contract with one or more nonprofit corporations, cities, or counties for public library services as part of their students' educational program, the State Library will estimate the total population living within the school district.

8. Libraries that enter into agreements or contracts with counties, cities, or school districts to provide public library services will be assigned population under this section whether or not there is an exchange of funds.

9. In libraries where the population of a federal or state eleemosynary or correctional institution or military installation exceeds 10% of the entire population of the area served by a public library, the residential or base population may be subtracted from the population served by that library if these persons are served by an institutional or base library. If the institution or military installation does not have a library that provides general library services, the population will not be subtracted.

10. When a library believes that the acceptance of county funding would result in the assignment of an unrealistic population figure, it may request in writing that the Library Systems Act Advisory Board approve an exception to the population served methodology. The board will use its discretion to devise a method by which data from the Bureau of the Census will be used to calculate the assignment of population served.

§1.72 Public Library Service

(a) Library services for the general public must be provided without charge or deposit to all persons residing in the local political subdivisions which provide monetary support to the library. These library services include the dissemination of materials or information by the library to the general public during the hours of operations of all library facilities. In this context, library services include the circulation of any type of materials, reference services (locating and interpreting information), use of computers to access information sources, databases, or other similar services, and admissions to the facility or any programs sponsored or conducted by the library.
(b) The following charges are permitted at the discretion of the library's governing authority: reserving library materials; use of **meeting rooms**; replacement of lost borrower cards; fines for overdue, lost, or damaged materials in accordance with local library policies; postage; in-depth reference services on a contractual basis; photocopying; printing; telefacsimile services; library parking; service to nonresidents; sale of publications; rental and deposits on equipment; and charges for the use of materials and machine-readable data bases not owned by the library, major resource center, or regional library system for which the vendor or supplier has charged a borrowing fee.

(c) Fees may not be charged for library services on the library premises by individuals or organizations other than the library unless the charges are permitted by subsection (b) of this section.

(d) As permitted by §1.73 of this subchapter, relating to Public Library: Legal Establishment, non profit corporations may enter into a contract with a school district to provide library services to the general public residing in the district. This public library service must be in addition to that provided to school students, faculty, and staff. Public library services must be provided at least the required number of hours all weeks of the year, except those weeks with national or state holidays. The number of hours is specified in §1.81 of this subchapter, relating to Quantitative Standards for Accreditation of Library.

§1.73 Public Library: Legal Establishment

A public library must be established to render general library services. The library must be established as:
(1) a department of a city or county government by charter, resolution, or ordinance; or by contract as provided for in the Government Code, Chapter 791; or
(2) a library district established under the provisions of Local Government Code, Chapter 326, Library Districts; or
(3) a library district established under the provisions of Local Government Code, Chapter 336, Multi-Jurisdictional Library Districts; or
(4) a non profit corporation chartered by the Office of the Secretary of State for the purposes of providing free public library services; these corporations must have a current contract with each funding source (a city, county, or school district) to provide free public library services for the city, county, or school district.

§1.77 Public Library: Local Government Support

(a) At least half of the annual local operating expenditures required to meet the minimum level of per capita support for accreditation must be from local government sources. Local government sources are defined as money appropriated by library districts, by school districts, or by city or county governments. Exemption: A public library that expends at least $17.50 per capita is exempt from this membership criterion if it shows evidence of some library expenditures from local government sources and is open to citizens under identical conditions without charge.

(b) If a currently accredited library is closed by action of its governing body, the commission, following a public hearing, may revoke that library's current membership in the state library system. This section will not apply if only the library building is temporarily closed because of natural or man-made disasters, or building construction, renovation, or maintenance. The library may be re-accredited as a member in the state library system during the next regular accreditation process, assuming that, by July 31, the library reports data showing that it currently meets all of the appropriate minimum requirements for membership in the state library system (as listed in §1.74 of this subchapter, related to Local Operating Expenditures; §1.75 of this subchapter, related to Nondiscrimination; §1.81 of this subchapter, related to Quantitative Standards for Accreditation of Library; §1.83 of this subchapter, related to Other Requirements; and §1.84 of this subchapter, related to Professional Librarian).

(c) If a currently accredited library suffers a funding reduction that causes the library to reduce its hours, staffing, or budget below its appropriate minimum requirements for membership in the state library system (as listed in §1.81 of this subchapter, related to Quantitative Standards for Accreditation of Library), the commission, following a public hearing, may revoke that library's current membership in the state library system. The library may be re-accredited as a member in the state library system during the next regular accreditation process, assuming that, by July 31, the library reports data showing that it currently meets all of the appropriate minimum requirements for membership in the state library system (as listed in §1.74 of this subchapter, related to Local Operating Expenditures; §1.75 of this subchapter, related to Nondiscrimination; §1.81 of this subchapter, related to Quantitative Standards for Accreditation of Library; §1.83 of this subchapter, related to Other Requirements; and §1.84 of this subchapter, related to Professional Librarian).

(a) A public library that does not meet one of the requirements for accreditation cited in §1.81 of this title (relating to Quantitative Standards for Accreditation of Library) may be provisionally accredited for not more than an initial three-year period, if the library can demonstrate a reasonable expectation of meeting the requirements within three years. At the end of the provisional accreditation, the library must fully meet all the requirements in effect at that time.

(b) A newly established library in a previously unserved county that does not meet two of the requirements for accreditation cited in §1.81 of this title (relating to Quantitative Standards for Accreditation of Library) may be provisionally accredited, if the library can demonstrate a reasonable expectation of meeting the requirements within three years. At the end of the three years, the library must fully meet all the requirements in effect at that time.

(c) After a library has been provisionally accredited, it must achieve full accreditation before it may be provisionally accredited under §1.80 of this title (relating to Probational Accreditation of Library).

§1.80 Probational Accreditation of Library

A public library that has been fully accredited may be granted probational accreditation for three years if the library fails to meet not more than one of the requirements in §1.81 of this title (relating to Quantitative Standards for Accreditation of Library). To regain full system membership, a library must equal or exceed its previous level of effort on the deficient requirement. At the end of the probational accreditation, the library must fully meet all the requirements in effect at that time. A library may not be probationally accredited for more than three years in a row, for any reason.
