

# AFFORDABLE CARE ACT PRINTED PUBLICATIONS AND FORMS INFORMATION

---

Shortly after our Webinar on the Affordable Care Act – Assisting Your Patrons ended on September 26, our presenter Cheryl Rowan (National Network of Libraries of Medicine – South Central Region) forwarded us this additional information related to printed publications and forms.

## **Printed Publications and Forms**

- If your state is participating in the Federally-facilitated Marketplace, the Centers for Medicare and Medicaid Services (CMS) has an [online ordering system](#) for print materials. Libraries are welcome to request these print materials from CMS, however, it is important to note that quantities are limited and stock is constantly changing. You will need to create an account to be able to view and order materials. Once you have an account, search on the keyword “marketplace” to see the available publications.
- In the near future, CMS expects to add an option to order and/or download print versions of the Federal Application form (not available until open enrollment begins on October 1). While print forms will be an option, applicants are strongly encouraged to apply online because they will see real-time eligibility and available health insurance options.
